Experience the sights, sounds, and feel of beautiful Newburyport Harbor, the Great Salt Marsh, and the Merrimack River. Our crew weaves together the area's maritime, economic and natural history, from the end of the last Ice Age 15,000 years ago to the most modern elements of life today, in one of America's most storied harbors. You'll learn what makes the salt marsh one of the most productive and biodiverse ecosystems on the planet. Common wildlife sights on this trip include osprey, eagles, hawks, herons, egrets, diving cormorants, harbor seals, and deer!

Enjoy lunch at Michael's Harborside: Choice of baked haddock or chicken mozzarella pasta, salad or clam chowder, strawberry shortcake.

We'll make a stop in downtown Newburyport, too!
